B - Caracterização da equipe de investigação de LA	A. Nº de investigadores/engenheiros com PhD	000
	B. Nº de Pós-graduação	000
	C. Nº de Mestrados	01
	D. Nº de Doutorado	01
C - Missão de LA	A. Missão (objetivos/Objetivos principais)	The Sociological Lab for Public Policy (Sociological Lab) promotes a unique interdisciplinary approach to the study of public policy and contributes to the resolution of contemporary societal problems and global challenges. The diversity of the models used requires a new approach that integrates social sciences and digital technologies to address societal problems and contribute to public policy. The Sociological Lab is specifically designed to assume this mission. To that effect, we interact with well-science practices in diverse and complementary fields in social sciences and digital technologies have joined together. These research units consist of qualified experienced research teams with know-how in the fundamental, the analysis, the implementation and the evaluation of public policies. The Sociological Lab promotes the development of a more advanced, integrated team of interdisciplinary work between social sciences and digital technologies to develop innovative contributions with impact for public policy.
	B. Descrição de LA	Our strategy to become a reference centre for public policies in the next decade is based on four pillars: (a) the production of new scientific knowledge aimed at supporting public policies, (b) the production of valuable information concerning public policies, (c) the transparent and independent evaluation of existing public policies, ultimately turning knowledge and research in data science and public intelligence in robust decision-making and public policy. To achieve this goal, it is crucial to build up an innovative research culture with high critical mass and excellent research capacity to pursue the objectives.
	C. Descrição de LA	
	D. Descrição de LA	
D - Área Científica	A. Área Científica 1	Computing
	B. Área Científica 2	Health Sciences
	C. Área Científica 3	Health Sciences
	D. Área Científica 4	Health Sciences
E - Palavras-chave	A. Palavras-chave 1	Health Sciences
	B. Palavras-chave 2	Health Sciences
	C. Palavras-chave 3	Health Sciences
	D. Palavras-chave 4	Health Sciences
F - Linha Temática	A. Linha Temática 1	1. Descrição de LA
	B. Descrição de LA	INTELLIGENT TELEHEALTH AND CARELESS VULNERABILITY
	C. Descrição de LA	Paulo Cesar Rodrigues (Co-), Cláudia Leite (Co-), Susana Barros (Co-), Maria Luiza Gomes Almeida (Co-)
	D. Descrição de LA	The new interdisciplinary collaboration of TL will produce unique contributions to knowledge over goals by developing and implementing innovative approaches to public policy, turning knowledge and research in data science and public intelligence in robust decision-making and public policy. To achieve this goal, it is crucial to build up an innovative research culture with high critical mass and excellent research capacity to pursue the objectives.
	E. Descrição de LA	RESEARCH INEQUALITY AND DISABILITY
	F. Descrição de LA	Research in Health Sciences, Health Sciences, Health Sciences
	G. Descrição de LA	Given our expertise in this domain, the Thematic Line builds on the work done to increase the scope and the quality of the contributions to public policy.
	H. Descrição de LA	These specific objectives will contribute to the reduction of vertical and horizontal inequalities in the National Developmental agenda, with a special focus on the most vulnerable, including, but not limited to, digital divide. These objectives are based on the Thematic Research and Innovation Agenda "Social Inclusion and Citizenship" and the National Action Plan for Digital Inclusion in Portugal, established by RCT and on the Sustainable Development Goals established by the UN in 2015, and SDG 10. Among the more traditional approaches from social sciences with the knowledge and tools from data science, TL will support Sociological approaches to public policy by sharing an exceptional multidisciplinary team specialized in the analysis of inequalities that will be a transformational player in this domain. Their expertise in different domains of knowledge will promote contributions with impact for public policy.
	I. Descrição de LA	Health Sciences, Health Sciences, Health Sciences
	J. Descrição de LA	To establish the Sociological Lab as a reference institution in the study of the most social determinants of health, by producing knowledge and evidence-based health interventions that may directly influence the design, implementation and assessment of public policies that empower and build the capacity of citizens, families, professionals, organizations and communities to address public policy, turning knowledge and research in data science and public intelligence in robust decision-making and public policy. To achieve this goal, it is crucial to build up an innovative research culture with high critical mass and excellent research capacity to pursue the objectives.
